

17 August 2020

Hello Honey Industry Partners!

We would appreciate your assistance spreading the word on our new research project. We are collecting samples of citrus blossom honey from locations around the world. There is a sample collection form included (page 2). We are requesting 118 mL/4 oz samples. Senders are not responsible for costs related to testing. These samples will be collected by QSI America and the testing will be used to support a future identity standard for citrus blossom honey.

The sooner you are able to share this opportunity with your constituents, the better this project will be. Thank you for your support!

The USP Honey Expert Panel

On behalf of

Norberto Garcia, Chair

and

Gina Clapper, Senior Scientific Liaison with FCC and US Pharmacopeia

Please contact Gina with any questions or comments (gina.clapper@usp.org).

Honey Expert Panel – Citrus/Orange Blossom Honey Classification Project Sample Collection Form

Thanks for sending us a sample of your citrus/orange blossom honey. This will be very helpful to our research and for the characterization of US citrus honeys.

Please send us this filled in form together with **4 oz honey sample material and ship to this address.**
